As a technical designer who builds apps, develops products, and leads teams, I create human-centered processes and designs that support and empower each of us.

Founder and Designer, JM Creative — since Apr 2023

- Create interior designs plus accessible products for institutional and residential clients
- Develop smart home controls: e-waste refreshed as subtle, reliable, useful buttons

Manager of Strategy, Konrad Group — Dec 2021 – May 2022

- Accelerated the global redesign of AutoZone's parts catalog and point-of-sale system
- Urgently improved team communication, folding individuals' goals into agile process

Senior Product Designer, Eden Health — Mar 2021 – Nov 2021

- Designed and tested patient- and provider-facing features for multiple telehealth apps

Principal UX Designer, Oracle via acquisition — Mar 2018 – Feb 2021

- Managed the Product Design team working on CrowdTwist CRM SaaS platform, designing features used by global brands to launch and run loyalty rewards programs
- Built custom branded web apps for audiences of brands like LEGO, Pepsi, and Vitamix
- Led a professional development lecture series for engineers after our acquisition, measurably improving technical team's ability to build modern, user-facing products

UX Designer, MediaMath — Sep 2017 – Mar 2018

- Ideated, tested, and communicated features for new omnichannel marketing platform

UX Designer and Art Director, University of Michigan — Nov 2011 – Aug 2017

- Developed new website platforms, marketing products, and internal systems for student-focused groups to uncomplicate workflows and strengthen their offerings
- Grew business for revenue-earning service units through website and CMS designs: 1.25× rate of fitness membership sign-ups; 20% more event service inquiries YoY
